

model prediction  
and training data

estimated  
errors

model  
uncertainty

flip predicted labels when  
estimated error is larger than  
probability of current prediction

model prediction  
training accuracy is 0.87  
testing accuracy is 0.78

GTDA estimated error  
AUC score is 0.90

model uncertainty  
AUC score is 0.66

corrected labels  
training accuracy is 0.98  
testing accuracy is 0.86
